#### **Marketing materials**

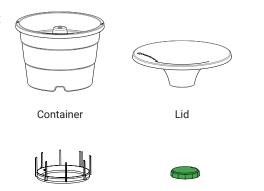

www.in2care.org/marketing

#### **Not Included:**

Not included with the In2Care stations are In2Mix refill sachets. In2Mix Sachets can be purchased separately.

### **Station parts:**

Floater

Green time indicator cap

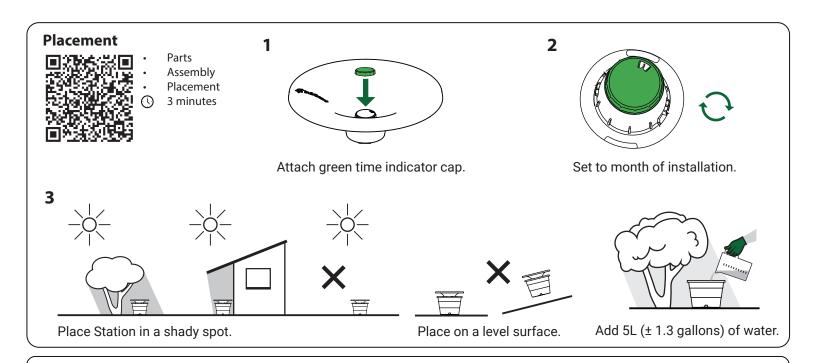

# No active ingredients included!

Personal Protective Equipment (PPE) might be required in your country / state for applicator protection during handling and deploying pest control products. Read the full label included with the In2Mix refill sachets and check your country / state requirements concerning the proper PPE guidance.

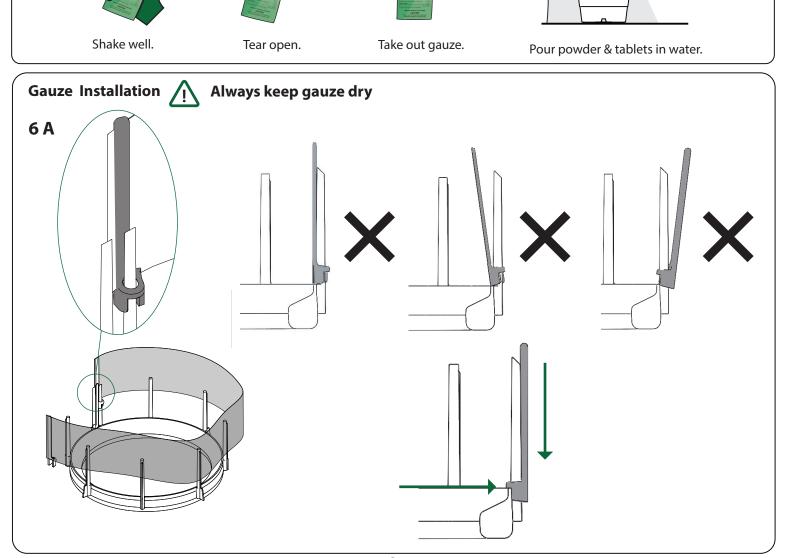

Evenly distribute Stations over available space

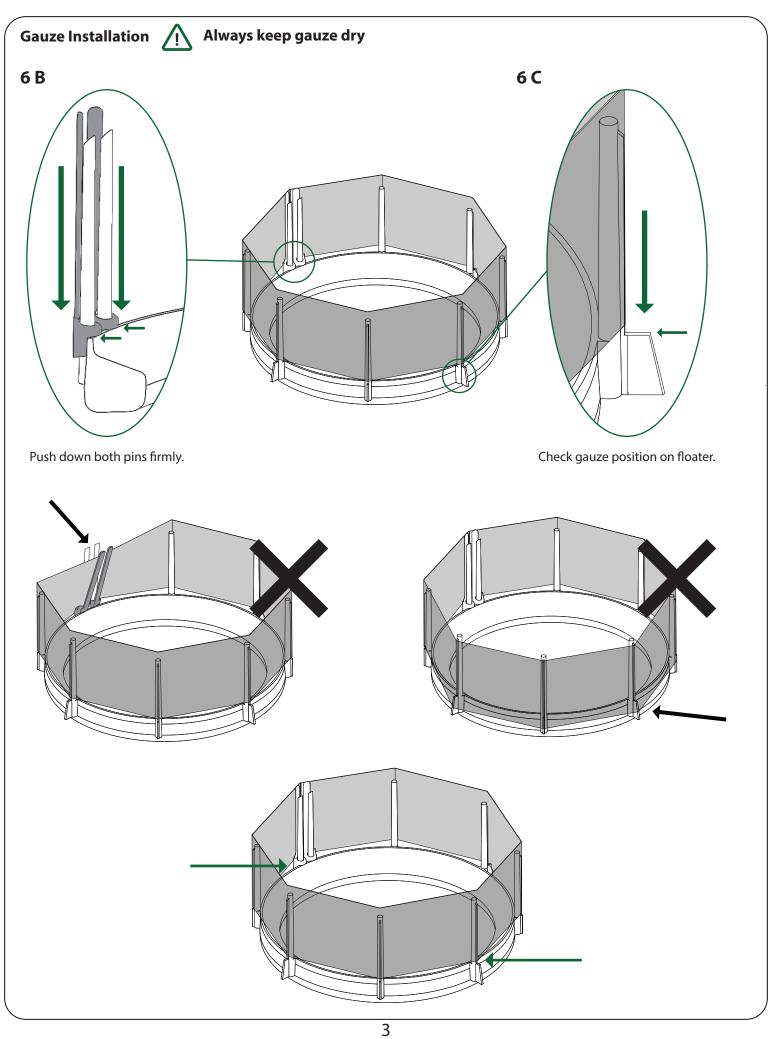

#### Recommendations

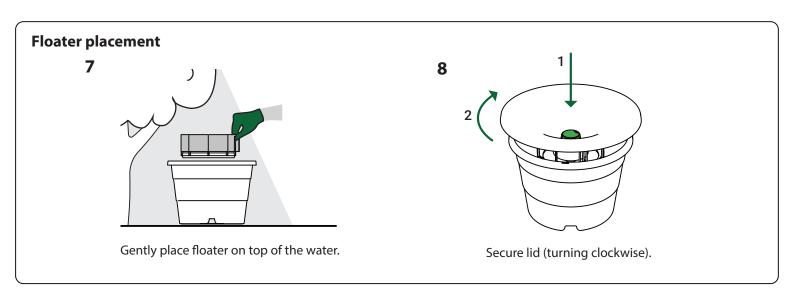

- Recommended Station coverage (1 Station per 400m<sup>2</sup>/10-15 per acre)
- Remove other mosquito breeding sites as much as possible. (flower pots, plastic cups, sewage drains, septic tanks, car tires, puddles, tree holes etc.).
- Larger water bodies should be (frequently) treated with appropriate mosquito larvicides.
- Place in shaded areas, in some cases this is close to human habitation/house. (e.g. 1 Station near humans, 2 Stations in the yard)
- In dry areas, check the water level inside the Station regularly.

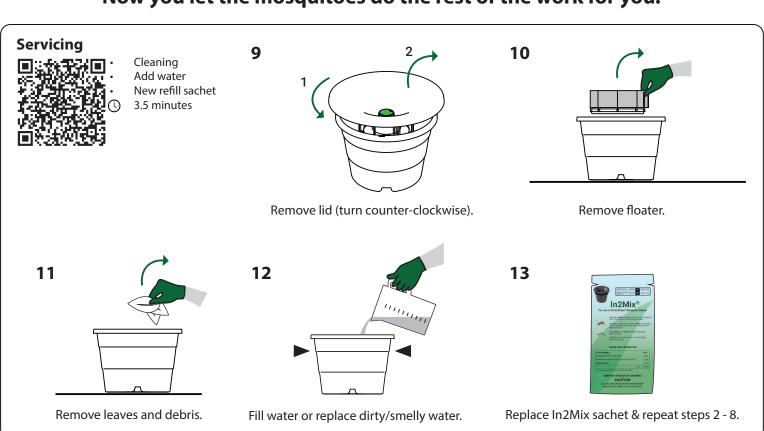

**In2Mix Sachet** 

# Now you let the mosquitoes do the rest of the work for you!

- Container fixing
- Lid fixing
- 8 simple methods
- 3 minutes

# **Handling & Storage**

- 1 year at 73°F / 23°C
- 2 years at 44°F / 7°C
- Avoid 110°F / 43°C
  - 1.5 minutes
