

How does In2Care make mosquitoes their own worst enemy?

In2Care[®]

Mosquito Station

Lawn care & Landscaping

1. Female mosquito attracted to Station

2. Lands on static netting and picks up biocide

Larvae are killed

3. Flies out carrying biocides

4. Contaminates the mosquito breeding site where she rests or lays her eggs, with a potent larvicide

Larvae are killed

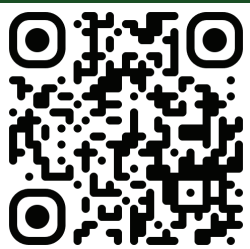

5. Mosquito dies within a few days, reducing chance of disease transmission

- Continuous control of mosquito population
- Profitable; fits recurring revenue model
- Environmentally friendly

In2Care[®]
Mosquito Control Solutions

EPA Approved & Effective against
Aedes & *Culex* Mosquitoes

THE INDUSTRY'S ONLY
MOSQUITO SPREAD CONTROL SYSTEM

#1 MOSQUITO CONTROL SYSTEM IN THE US

"After two months and almost 200 Stations installed, we can confidently say that they are working. Customers have told us in years prior, they couldn't be out in their yard or even their garage this time of year, but after having the Stations installed, they've been able to do so bite-free!"

Chris Lemke, Technical Director at Weedman's Mosquito Hero

"In2Care is a really, really good system. It's a great option for us to help our customers eliminate those pesky mosquitoes once and for all. As soon as I saw the product, I knew there were some great possibilities. For example, the ability for the mosquito to leave the area and bring the larvicide to other areas is what gives us control of the greater mosquito population. In addition, In2Care is a safe, effective treatment for mosquitoes that removes any concern for pollinators. I would say the more In2Care Stations that are out there, the better."

Eric Dubois, Owner of Absolute Pest Control, California

**The Industry's Standard
for Green Mosquito Control**

In2Care®
Mosquito Station

Emerald Lawns, Texas

"We have weighed all pros and cons of various mosquito control options in terms of cost, effectiveness and the environment. In2Care came out as best and with guaranteed results. In2Care is a pet-friendly canister that combines research and design to combat the insecticide-resistant Aedes mosquitoes".

OneTwoTree Inc, Florida

"At One Two Tree, the family's safety is top priority. That's why we're using In2Care to combat disease-carrying mosquitoes from attacking you, your family and your guests. In2Care is a fantastic, green product, that works in all yards"
